**Orderable - CGenTissue QFPCR Microarray (CG Microarray)**

**Turnaround Time:** QF-PCR – 3 days  
Microarray – 4 weeks (if clinically indicated)

**Alternate Name(s):**
Chromosome Analysis  
QF-PCR  
Microarray

**Specimen:**
Amnion (0.1-5cm²), cord (1cm³), chorionic villi or fetal skin (0.5-1cm²) preferred - In a sterile container, containing Hank’s Balanced Salt Solution (HBSS)

**Collection Information:**
The tissue of choice is (0.5-1 cm²) piece of fetal skin placed in a sterile vessel containing HBSS. If fetal skin is unavailable, then amnion, cord or chorionic villi is acceptable

**Reference Ranges:**
See report

**Special Processing:**
As products of conception are prone to microbial contamination, collect sample as aseptically as possible and send to the laboratory within 24 hours.

**Comments:**
The Cytogenetics Lab is staffed from 0700-1700 (Monday-Friday), ext. 78974 (office), or 75714 (lab).

For additional information please refer to the [Cytogenetics Webpage](#).

**Critical Information Required:**

Receive in laboratory within 24 hours of collection.

**Storage and Shipment:**

If unable to transport immediately, store at 4°C and transport at room temperature (15-25°C) within 24 hours.
