Orderable – E-order/Requisition
Turn Around Time: Within 7 days  STAT: 1 day

Alternate Name(s):
Esophageal Brush/Wash
Stomach Brush/Wash
Bileduct Brush/Wash
Duodenal Brush/Wash

Specimen:
Non-Gynaecological: Gastrointestinal/Hepatobiliary

Collection Information:
Click here for the External Client Cytology Collection Method if you are not at LHSC or SJH.

Reference Ranges:
See report

Interpretive Comments:
Clinical history is an important component for diagnostic interpretation.

Special Processing:
The specimen is Thinprep processed so the total specimen volume should not exceed one orange top specimen container with Cytolyt included.

Critical Information Required:
It is important to clearly identify and separate all specified sites.
Separate requisitions and specimen containers for all specimen types increases the accuracy of the diagnostic results.

**Storage and Shipment:**

Specimen container **must be** labelled with patient identification, specimen type and a Cytology fixative label previous to transport. Transport all specimens in a biohazard transport bag with the specimen in the zipped area separating the requisition in the side pocket.
