<tbody>
<tr>
<td>Nasopharyngeal swabs</td>
<td>Insert flexible, fine-shafted swab into nasopharynx, rotate in circular manner to collect cellular material. Place swab in Viral Transport Media (VTM).</td>
<td><img src="image.png" alt="VTM" /></td>
</tr>
<tr>
<td>Nasopharyngeal aspirate</td>
<td>Using mucous collection device, insert appropriately sized catheter nasally into posterior nasopharynx. Apply suction, using intermittent suction as catheter is withdrawn. If necessary use small amount of viral transport media to wash sample out of tubing. Transfer aspirated sample to a sterile container.</td>
