London Health Sciences Centre
Multi-Organ Transplant Program

Transplant Vaccination Schedule

This form needs to be completed and provided back to your Transplant Team: _____.
NAME

Because of antirejection medications and immunosuppression, the Transplant Program strongly advises that patients who are being assessed for transplant, are on a transplant waiting list or have had a transplant, receive all recommended vaccines. COVID-19 vaccine and annual flu shot are seasonal and patients should get this vaccine when available. This is separate from the schedule below. A FAQ on vaccinations is available on our website.

The following is a recommended vaccination schedule. No more than 3 vaccines should be given per visit. Prevnar and Menactra should not be given during the same visit.

For Non-Hepatitis B-Immune Patients:		For Hepatitis B Immune Patients:	
Required	**Vaccine**	**Required**	**Vaccine**
Visit 1		**Visit 1**	
Date yyyy/mm/dd	☐ Prevnar 20	Date yyyy/mm/dd	☐ Prevnar 20
	☐ Tdap		☐ Tdap
	☐ Shingrix^		☐ Shingrix^
Comments:

Date yyyy/mm/dd	☐ Haemophilus Influenza B	Date yyyy/mm/dd	☐ Shingrix^
	☐ Hepatitis B vaccine* (1st dose - 40 mcg)		☐ Haemophilus Influenza B
	☐ Shingrix^		
Comments:			
Visit 3 (4 weeks after Visit 2)		**Visit 3 (4 weeks after Visit 2)**	
Date yyyy/mm/dd	☐ Hepatitis B vaccine* (2nd dose - 40 mcg)	Date yyyy/mm/dd	
Comments:			
Visit 4 (6 months after initial dose at Visit 2)			
Date yyyy/mm/dd	☐ Hepatitis B vaccine* (3rd dose - 40 mcg)	Date yyyy/mm/dd	
Comments:			
Other Vaccines			
☐ 4-Valent HPV vaccine* - single dose – as required/requested by the patient			

- All vaccines are covered by OHIP with the exception of HPV. Shingrix is covered by OHIP for people between the age 65-70.
- *Hepatitis B vaccine is not covered after transplant. These vaccines may be covered by some private insurance plans.
- ^ Suggested in some patients, speak to your transplant specialist
- Menactra may be recommended with specific indications (e.g. splenectomy).
- Vaccinations can be arranged by the Primary Care Provider. If you have any concerns or issues in getting your vaccines, please contact your Transplant Team who will arrange an appointment with the Transplant Infectious Disease Specialist.
