

**Initiate therapy with NO Anticoagulation:**

- Prime with heparin (unless HIT)
- Blood flow 250-300 ml/min
- Dialysis 0 ml/hour
- Predilution (PBP) 2000 ml/hour
- Post dilution (replacement 200 ml/hour)
- If increased clearance required, add as dialysis fluid

***Filter > 24 hours***

**Continue with no anticoagulation**

***Filter < 24 hours***

**Address blood flow rates/vascular volume/line issues**

***Filter < 24 hours***

**Reassess line issues/vascular volume and consider heparin**

***Filter < 24 hours***

**Consider citrate if no line issue**
