

Initiate therapy with NO Anticoagulation:

- Prime with heparin (unless HIT)
- Blood flow 250-300 ml/min
- Dialysis 0 ml/hour
- Predilution (PBP) 2000 ml/hour
- Post dilution (replacement 200 – 500 ml/hour)
- If increased clearance required, add as dialysis fluid

Filter > 24 hours

Continue with no anticoagulation

Filter < 24 hours

Address blood flow rates/vascular volume/line issues

Filter < 24 hours

Reassess line issues/vascular volume and consider heparin

Filter < 24 hours

Consider citrate if no line issue
