

SWORBHP Smartphone Apps

SWORBHP is proud to announce the launch of our smartphone applications for iPhone, Android and Blackberry mobile devices.

January 17, 2013: iPhone App Released

The SWORBHP smartphone apps are now available on iPhone. The app containing the PCP medical directives is available in the App Store under the name SWORBHP PCP. The app containing the ACP medical directives is currently awaiting approval from Apple and will be available under the name SWORBHP ACP.

Thank you to all who participated in the beta testing of the iPhone apps. We received plenty of feedback, the majority of which has been implemented into the application. Any feedback that was not implemented in this release is being prepared for future updates.

All versions of the smartphone apps are available at:

www.sworbhp.com/mobile_app

Separate applications have been developed for ACPs and PCPs, allowing quicker access to directives. These Apps will provide support to all Android phones running operating system 2.3.3 or later, and any Blackberry phone running operating system 5.0 or higher.

For technical support regarding the smartphone apps, please contact Al Rice at alan.rice@lhsc.on.ca.
