Turn Around Time: 24 hours
STAT: 1 hour

Alternate Name(s):
Amphetamines
Methamphetamine
Dextroamphetamine
MDMA
Ecstasy

Specimen:
Random urine

Collection Information:
Collect random urine in a sterile container.

Reference Ranges:
Negative

Interpretive Comments:
A positive result for the Amphetamine Screen indicates that any of the following drugs may be present in urine alone or in combination: methamphetamine, amphetamine, MDMA (Ecstasy) or dextroamphetamine, at a minimum total concentration of 1000 ng/ml. This result is to be regarded as preliminary/presumptive unless subsequently verified by a definitive confirmation test (available upon request by calling the Toxicology Laboratory).
