**Orderable - BENSU**

**Turn Around Time:** 24 hours  
**STAT:** 1 hour

**Alternate Name(s):**

Benzo Screen

**Specimen:**

Random urine

**Collection Information:**

Collect random urine in a sterile container.

**Reference Ranges:**

Negative

**Interpretive Comments:**

A positive result for the Benzodiazepine Screen indicates that the drug may be present in urine at a minimum concentration of 200 ng/mL, and is to be regarded as preliminary/presumptive unless subsequently verified by a definitive confirmation test (available upon request by calling the Toxicology Laboratory).
