**Orderable - DIC**

**Turn Around Time:** 4 hours  
**STAT:** 1 hour

**Alternate Name(s):**
DIC Screen

**Specimen:**
4 mL Lavender (K<sub>3</sub>EDTA) and 2.7 mL Blue (3.2% Sodium Citrate) Vacutainer tubes

**Collection Information:**
Collect blood aseptically in Vacutainer tubes.

INR/PTT and FIBC can be ordered together on the same tube, platelet count is part of CBC.

**Reference Ranges:**
See individual ranges and values for INR, PTT, Platelet Count and Fibrinogen.

**Interpretive Comments:**
Screen consists of INR, PTT, Platelet Count and Fibrinogen.

No single test is conclusive in the diagnosis of DIC and results must be assessed in relation to each other.
